

Kevin Sultana Herman

Software Engineer

Jakarta, Indonesia | [+6285718159757](tel:+6285718159757) | kevinpdg.ks@gmail.com | [LinkedIn](#) | [Github](#) | [Portfolio](#)

SUMMARY

Software Engineer with expertise in building scalable web and cross-platform mobile applications using Next.js, React Native, and TypeScript. Experienced in delivering complete digital solutions, from e-commerce systems with integrated payment gateways to complex internal tools for enterprise clients. Backed by a strong foundation in server management (Linux/Proxmox) and digital marketing, bringing a rare combination of technical depth and product-driven thinking to every project.

EDUCATION

Hacktiv8 <i>Front End React Ne (FERN) (Transcript)</i>	Jakarta, Indonesia <i>May 2025 – September 2025</i>
Remote Worker Indonesia <i>(RWID) Mobile React Native and UI UX basic</i>	Jakarta, Indonesia <i>February 2024 – September 2024</i>
Universitas Jayabaya <i>Bachelor of Mechanical Engineering (GPA 3.08/4.00)</i>	Jakarta, Indonesia <i>2014 – 2017</i>
Universitas Indonesia <i>Transferred Mechanical Engineering</i>	Depok, Indonesia <i>2012 – 2014</i>

WORK EXPERIENCE

Unotek Dimensi Mandiri <i>Software Engineer</i>	Jakarta, Indonesia <i>July 2025 (Current)</i>
• Engineered an ITIL-compliant ITSM web platform for PLN, delivering end-to-end ticketing workflows and comprehensive audit trails. • Developed interactive operational dashboards with strict Role-Based Access Control (RBAC) and organizational data isolation. • Optimized UI/UX and frontend performance by implementing reusable components, virtualization, and input debouncing.	
Unotek Dimensi Mandiri <i>Mobile Developer</i>	Jakarta, Indonesia <i>September 2024 – July 2025</i>
• Developed a cross-platform React Native app to fully digitize warehouse operations, including picking, packing, and cycle counting. • Integrated Barcode/QR scanning and Bluetooth/Wi-Fi thermal printing (ZPL/CPCL) for automated inventory tracking and labeling. • Optimized application performance for low-end devices using FlatList virtualization and state memoization. • Integrated thermal printing for packing labels and rack/bin tags: Bluetooth/Wi-Fi printers with ESC/POS and ZPL/CPCL commands, reusable label templates (SKU, qty, lot/serial, order ID, QR/Code128), print preview/reprint, batch printing, and robust error handling (paper-out, connectivity loss, retry queue).	

SKILLS

Languages: TypeScript, JavaScript (ES6+), Dart, HTML5, CSS3

Frontend Web: React.js, Next.js (App Router), Tailwind CSS, Vite, shadcn/ui, Recharts

Mobile Dev: React Native (Expo & CLI), Flutter, Expo Router, BLE Thermal Printing, Barcode/QR Integration

Backend & State: Node.js, Express.js, REST APIs, Firebase, Redux Toolkit, Zustand, TanStack Query

DevOps & Infra: Linux, Proxmox (Homelab Server), Vercel CI/CD, Expo EAS, Git/GitHub, n8n (Automation), Ollama

PROJECTS

ITSM (PLN BAG)

December 2025

Built a comprehensive Next.js frontend for an IT Service Management platform, streamlining complex Incident, Service Request, and Change Request approval workflows.

Developed interactive administrative portals featuring real-time reporting modules, agent workload management, and automated SLA compliance tracking.

Tech stack: Next.js, React, JavaScript, CKEditor, Custom SSO

Hearts2 Mobile (Hino Motors)

June 2025

Developed a high-performance cross-platform mobile application with native-like fluidity using React Native and React Native Paper UI libraries.

Architected clean navigation patterns and multi-role views optimized for seamless deployment across both Android and iOS devices.

Tech stack: React Native, JavaScript, Android, iOS

MBG SPPG (ERP / Operations Platform) [link](#)

May 2026

Architected an integrated full-stack ERP platform to fully digitize operational administration and large-scale asset allocation tracking.

Streamlined high-volume workflows by developing modular sub-systems for real-time meal delivery tracking, attendance, automated payroll, and warehouse inventory.

Tech stack: Next.js, React, Express.js, Node.js, Prisma

Reachable Goods (E-Commerce) [link](#)

June 2026

Engineered a high-performance full-stack e-commerce architecture from scratch, featuring advanced inventory controls and flat-rate shipping algorithms.

Integrated secure digital checkout mechanisms via Midtrans payment gateway alongside Minio object storage for optimized product media delivery.

Tech stack: Next.js, Express.js, Node.js, Prisma, Midtrans, Minio

Superlife Bio Indonesia (Company Landing Page) [link](#)

April 2025

Delivered a production-ready, highly responsive corporate profile web application ensuring polished layout consistency across all viewports.

Optimized front-end asset compilation to elegantly present multi-national product catalogs, corporate achievements, and global timeline events.

Tech stack: Next.js, React Native expo, React Context, Firebase, Tailwind CSS, SweetAlert2, React Icons

Point Juaro (Web Apps and Web Apps) [link](#)

August 2025

Developed an e-commerce web application as a Hacktiv8 final project, focusing on production-grade frontend file structures and modern layout architectures.

Enforced strict code quality standards and consistent code-styling compliance through customized PostCSS pipelines and strict ESLint configuration rules.

Tech stack: Next.js, React Native expo, React Context, Firebase, Tailwind CSS, React Icons
